He began to compose outside of music journalism in the late 1960s, producing a series of concert and teaching pieces in workshops and public events, the most influential of which was his 1969 Requiem for New York. The Genius of Bud Powell is an album by Jazz pianist Bud Powell, released by Prestige in 1949. The album consists of mostly difficult bop tunes by Powell, which would not have been readily understood by the general audience and which were more likely to cause a thumbs down in a then youth-oriented record shop. This was a change in style from Powell's earlier, more accessible recordings with the Count Basie Orchestra. In a magazine interview, Powell commented on this subject: "I was just switching into my new Bud Powell and Willie the Lion Smith kind of album, and then the trumpeter played the first tune that he wrote for the Basie orchestra. It was a hit, and all the audience was clapping their hands. I was thinking, 'Oh my God! I think I've struck on something. I've gone too far into the new direction. People aren't going to like it, but it's a brave new world. I'm going to stay out here, though. People don't like change. They'll get used to my new thing.' That's what happened, and I did it again." In the early 1980s, Powell's first three Prestige albums were re-issued in a box set. As noted in the original liner notes, this was done to introduce Powell to a new generation of listeners. However, the box set did not include the album *The Genius Of Bud Powell*, which was released in 1949. This album was reissued in 2002, containing five previously unissued tracks, including a longer version of "The Nightingale." "The Nightingale" is a version of a song called "Mood Indigo," which Powell recorded in 1940, and it was a hit, reaching number 16 in the *Billboard* charts that year. Powell had previously recorded an alternate version of "Mood Indigo" in 1944, which was included on his album, *The Three Moods Of Bud Powell* (1944). "Mood Indigo" was also included on the album *The Genius Of Bud Powell*, although its title was changed from "The Nightingale" to 2d92ce491b
